

Kubota Genuine Coolant

PART NO. 70040-0L014

Kubota Genuine Coolant is a premium Ethylene Glycol-based phosphate coolant certified for Kubota Engines. Its formula consists of unique characteristics to meet Asian vehicle application and does not contain any silicate, borate, nitrite, etc that can cause problems in the cooling system.

- Benefits:**
- Meets performance requirements for Kubota and other Asian engines
 - Superior long term corrosion and cavitation protection
 - Avoid risks indicated below

Risk 1: Corrosion

- Parts collected from after long term fleet test
- Results shows Kubota Genuine Coolant performs better protection

	Borate, Silicate-OAT Coolant	Kubota Genuine Coolant
Cylinder head inlet		
Radiator tube		
Water pump		

Risk 2: Cavitation caused by Borate

- Result from water pump cavitation test (impeller shown on image)
- Results show Kubota Genuine Coolant has excellent aluminum anti-cavitation corrosion properties

Risk 3: Gel generation caused by Silicate

- This can lead to radiator plugging and coolant leakage.

Silicate gel generated can cause plugging and leakage
